Important Information for Correspondents and Customers

McGregor's Year Book

This new Year Book, our silent salesman, comes to you offering at manufacturers' and growers' prices, the stock of one of the largest plant-producing establishments in the United States—offering something for every garden, everything for some gardens. Years of experience in packing plants has resulted in methods enabling us to guarantee their safe arrival, and in the years of our business career our products have found their way into every state and territory and into many foreign countries. For over 40 years we have pleased the flower lovers of America, and the business today is under the

direct control of the founders and their sons. Our guarantee is an asset with us and a safeguard to you, giving absolute security to mail order buyers. We promise you as fine stock as can be grown, a large assortment and good service, and we believe therefore, that this catalogue, which we hope will be found pleasing and helpful, is entitled to the consideration of all buyers.

Comparative Value of Roses

Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose-growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots and the three-year-old plants are to be recommended.

Advantage of Pot Grown Roses

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of the earth contains all of the fine fibrous roots, and when the plants are shipped transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

Winter Protection of Roses

We have indicated the blooming season and hardiness of roses, as follows: "Monthly Blooming" and "Summer Blooming Hardy with Protection," which refers to the Teas and Hybrid Teas, that should have protection through the winter. "Hardy Summer Blooming" and "Hardy June Blooming" refers to those which are hardy and do not require protection; the Hardy Climbers included. Bush Roses, however, whether Teas, Hybrid Teas, Hybrids or the Cluster flowering types are always helped with that winter protection that keeps the plants and the ground around the base of the plants dry. There is much more in common, or should be, between animal and plant life than is generally acknowledged by those who strive for success in growing roses. Both demand a sufficiency of nourishing food and drink, a pure atmosphere, careful protection and thorough cleanliness.

Our Nursery Department

Being separate from our Green-houses, shipments of Trees, Evergreens, Fruits, etc., are sometimes sent separately.

Writing About Orders

We exercise the utmost care in filling orders, yet in the busy season errors or losses sometimes occur. Should you find it necessary to write about an order, be sure to give us date and copy of the original, amount of remittance, with full information to aid us in promptly taking care of the matter.

Premiums

Our terms being cash with the order enables us to give additional plants, bulbs, and seeds on orders amounting to \$1.00 or more, as follows: On \$1.00 worth of goods bought at single Plant, Bulb or Packet prices, select plants, bulbs or seeds to the value of 20 cents extra. On a \$2.00 order select 40 cents extra. On a \$3.00 order select 60 cents extra. On a \$5.00 order select to the value of \$1.00 extra. On \$6.00 select \$1.20 extra, etc. Larger orders, premiums in proportion. We do not allow premiums on nursery stock, nor can we give same as premiums.

Guarantee

We guarantee all Shrubs, Plants, Bulbs and Seeds that we send out to points within the United States to reach purchaser in good condition, when forwarded by mail or express. After goods are delivered to purchaser in growing condition our responsibility ends.

FREE OFFER

If you send us an order amounting to \$1.00 from a friend or neighbor who is not now a customer of ours, we will send you any one of the beautiful Roses shown in color on the face of cover of this book, free. If order from new customer amounts to \$2.50, we will send you any three of the Roses. If order amounts to \$5.00 we will send you the six Roses. (Roses 1-yr. size.)

Remittance With Order

Please send sufficient money to cover your entire order. The safest way is by Postoffice Money Order or Express Money Order. Postage stamps may be sent for small amounts provided two cents extra is sent with the remittance. Send perfect stamps only.

If You Wish Orders Held

be sure to say so, then any later date desired; otherwise we can book your order at once, and for shipment without further instructions.

Express Shipments

If you wish plants sent by order by express. Large decorative plants, shrubs and all heavy stock must be sent by express.

Parcel Post Shipments

Any reasonable sized pack- age of mailable plants can now be sent by parcel post (see page 2 for postage rate).

Our Prices

will compare favorably, we believe, with those of any responsible firm in the United States, and are so low we must ask cash with order.

Surprise Offer—After-Season Sales

Propagating as we do six months in advance of the selling season, we must not be satisfied until we have taxed the limit of our capacity and made allowance for natural increase of business. As a result we generally have surplus of all kinds of plants and rather than carry this stock over, we hold a Clearance Sale beginning June 1, and make up Surprise Collections of miscellaneous plants at 98c per collection, six collections for \$4.88. In these 98c collections we give several dollars worth of plants. The plants in these collections must be strictly our selection. Orders accepted any time during the spring for delivery June 1st.

Add Postage, Boxing and Packing Charges for All Mail and Parcel Post Shipments. See Table Below.

Notice If goods are ordered by mail or parcel post, postage and packing charges must be added for every dollar or fraction of a dollar's worth of goods ordered—per table below, to cover boxing, packing and postage. This applies to all orders including seeds in pints and quarts. Seed in packets posted free. This enables us to give our customers the lowest possible selling prices with delivery charges fair to all. Simply add postage and packing charges for every dollar or fraction of a dollar's worth of goods ordered according to the state in which you live. If you live in Alabama, add 6 cents for every dollar; if in Kentucky, add 4 cents; if in Nebraska, add 7 cents for every dollar's worth ordered. Purchaser pays the charges on all express shipments.

Postage Table RATE PER DOLLAR

Remember that our premium offer more than offsets postage and packing charges, and that you may select 20 cents' worth of goods extra for every dollar's worth purchased, excepting on special offers and collections

Climbing American Beauty

"A hardy Climbing Rose which in size of flower, color, form and fragrance is equal to its parent, the grand cut-flower Rose, American Beauty."

SOFT GLOWING RED

(Hardy June blooming.) Climbing American Beauty, the new porch Rose, gives us a new Rose of wonderful beauty and merit. It is a cross between the world famous cut-flower Rose, American Beauty, and an unnamed seedling. It is an American production, the product of American Rose growers. It is perfectly hardy, strong growing, making canes from ten to fifteen feet in a season; a perfect mass of bloom in June and produces flowers occasionally all through the growing season. The foliage is large, bright, glossy green, and never shows signs of any of the diseases that affect Roses. The color is a soft, glowing red; identical with the American Beauty, and with the same exquisite fragrance. The flowers are of a size three to four inches in diameter, finely formed on long stems, and are produced in great profusion. This new Rose will bloom in almost any situation where a climbing, pillar or porch Rose is desired. Success beyond expectations has been found in producing a climbing Rose of the same color, size of flower and fragrance of its pollen parent, the American Beauty, with the addition of better foliage and blooming qualities; one plant producing twenty times as many flowers in June as the American Beauty bush

NOTICE We have indicated the blooming season and hardiness of roses, as follows: "Monthly Blooming" and "Summer Blooming, Hardy with Protection," which refers to the Teas and Hybrid Teas, that should have protection through the winter. "Hardy Summer Blooming" and "Hardy June Blooming" refers to those which are hardy and do not really require protection; the Hardy Climbers included. Bush Roses, however, whether Teas, Hybrid Teas, Hybrids or the Cluster flowering types are always helped with that winter protection that keeps the plants and the ground around the base of the plants dry. There is much more in common, or should be, between animal and plant life than is generally acknowledged by those who strive for success in growing Roses. Both demand a sufficiency of nourishing food and drink, a pure atmosphere, careful protection and thorough cleanliness. With this in mind we should have real success.

POPULAR HARDY HEDGE PLANTS

The above is an illustration of Ibota Privet hedge resulting from plantings six to twelve inches apart. When not trimmed, the appearance of growth is spreading, somewhat like the Japan Barberry. (described below) California Privet is very similar.

Ibota Privet - \$1.50 per doz.

This variety of Privet is more spreading than the California, and it is probably the variety of all the varieties. It is of dense growth, good green foliage, grows well in all soils. It can be trimmed as desired and will give the straight line hedge or the spreading type as would be represented by its natural growth. It is becoming more popular every year. Highly recommended. We issue a special leaflet on "Different Kinds of Hedges and Hedge Planting," which will be mailed on request. Nice plants, \$1.50 per dozen, \$10.00 per 100. Two-year plants, \$2.00 per dozen, \$12.50 per 100. Large two-year plants, \$2.25 per dozen, \$14.80 per 100. Selected plants, \$2.75 per dozen.

Japan Barberry - \$1.25 per doz.

"Grows anywhere, branching gracefully; striking color." (Berberis Thunbergii.) Where a dwarf deciduous hedge is wanted, nothing equals this beautiful Barberry. Requires but little pruning to keep in shape. The leaves are small, light green, and towards fall assume rich, brilliant colors, the fruit or berries becoming scarlet. Absolutely hardy in all parts of the country. Nice plants, \$1.25 per dozen; \$8.00 per 100. Stronger plants, \$1.50 per dozen; \$12.00 per 100. Two-year plants, \$2.00 per dozen; \$15.00 per 100. Bridal Wreath - \$2.00 per Doz.

(Spirea Van Houttei.) The most beautiful of all the Spireas, and one of the very best of all shrubs; a complete fountain of pure white bloom in May and June. California Privet- 85c per doz.

Of all hedge plants this is the most popular, and more of it is planted than all others combined. It is free growth and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. Its foliage is a rich, dark green, nearly evergreen, remaining on the plant until mid-winter. Nice plants, 85c per dozen, \$6.00 per 100. Large two-year plants, \$1.20 per dozen; \$9.00 per 100. Selected plants, \$1.50 per dozen.
